

WIRE CAPTURE ACCESSORY KIT USER'S MANUAL

Revised June 18, 2007

Use the tools from the Wire Capture Accessory Kit together with HotPlug™ to capture a computer that can not be seized with the standard capturing method. WiebeTech recommends that you watch the video on the accompanying CD for a visual demonstration of how to use this kit. The video is also available for viewing on the HotPlug product page on the WiebeTech website. Note: HotPlug is a covert product, so its product page is inaccessible through normal browsing. Contact WiebeTech if you need help finding the site.

AC Tester

Wire Insulation Splitter

Cable Piercing Tool

Using Wire Capture Kit

- 1. Plug the AC tester into the desired outlet.** The two right indicator lights will glow if the outlet has been wired correctly. If that is not the case, skip to step 5.
- 2. Plug HotPlug into a UPS and then into the outlet.** Turn HotPlug on.
- 3. Disassemble the outlet by unscrewing the face plate.** Slide the face plate out of the way and remove the screws to pull out the outlet. If the outlet registered correctly with the AC tester, the red wire should be hot, the white wire should be neutral, and the green wire should be green.
- 4. Arm HotPlug.** After HotPlug is armed, use insulated wire cutters to cut the hot wire first, and then the neutral and ground wires. You are now free to take HotPlug and your UPS away from the capture site. Skip the rest of the steps.
- 5. If the AC tester did not give a positive result then use the wire insulation splitter to remove a section of the sheath.** After you have carefully cut the sheath back enough to where the wires are exposed, pierce the white wire with the red piercer. Then pierce the black wire with the black piercer. Use electrical tape to secure the piercers in place.
- 6. Turn on HotPlug and then arm it.** You can now unplug the unit and take it and HotPlug away from the capture site.

WARNING: Risk of lethal electric shock. Live terminals exposed during normal usage can carry sufficient voltage to be harmful or deadly to the user. Read this manual in full before using HotPlug. Care should be taken while using this product; WiebeTech recommends product training.
