

COMBOGB™

The best full-featured portable drive we've ever made!

ComboGB is your best choice for a full-featured drive. It offers maximum connectivity, performance and ruggedness, all in a size that fits easily in your pocket. And because it comes with all the cables you'll need to plug in to nearly any computer, ComboGB is one of the most versatile portable drives on the market.

Maximum connectivity

ComboGB provides native ports for three connection types: FireWire 400, FireWire 800, and USB2. As a result, you can connect it to any computer running any recent operating system. It's easy and painless.

To make sure you can connect in any situation, a total of five different cables and adapters are included.

ComboGB is bootable in FireWire mode on any Mac or PC that supports this feature.

Maximum performance

And it's fast! Configure ComboGB with a 7200 RPM drive and there is no performance difference between ComboGB and our other 7200 RPM drive enclosures.

Attractive and durable

ComboGB also features an attractive case – a perfect balance of aluminum and synthetic materials. The textured finish makes for a sturdy enclosure that's easy to hold or pick up, while the brushed and embossed aluminum inset panel looks great.

Plug and play

ComboGB works out of the box with no new drivers needed with any modern operating system including Mac OS 9.1, 9.2, OS X and Windows 2K, XP, as well as any distribution of Linux that supports FireWire or USB. If using FireWire, additional FireWire devices can be daisy-chained through ComboGB.

AC adapter optional

Most FireWire and USB ports provide enough juice to power ComboGB, so most users prefer to use ComboGB without an AC adapter for maximum portability. For users who prefer an AC adapter or who must use one with their computer, an AC adapter is available separately.

You will need an AC adapter (or use the included USB power cable) if the port you are plugging into does not provide enough power for ComboGB. This includes all 4 pin FireWire hosts (such as Sony iLink which provides no power at all) and some USB ports.

In most situations, the provided USB power cable can power the drive and pass data at the same time. Alternately, the USB power cable can be used for power only so you may use the USB cable for power and still use a FireWire cable for data.

For yet another configuration option, WiebeTech's Cable-32 is a smaller USB power cable (with no USB pass through) and is an optional power cable for ComboGB.

Tested and Formatted

When you buy a drive from WiebeTech, we go the extra mile to make sure your product works for your computer. Before your order is shipped, it is individually tested and formatted to your needs whether it is Mac, PC or both.

FEATURES

Three Ports

FireWire 800, 400 and USB 1.1 / 2.0. FireWire ports are bus powered.

Power LEDs

Indicate power is on (or off).

Access LEDs

Indicate power is being accessed.

Brushed and Embossed Aluminum Case

With textured finish.

Drive Capacities

Available with 2.5" notebook drives or install your own.

Extremely Fast Transfer Rates

FireWire 800 will outperform many older desktop FireWire drives when configured with a 7200 RPM drive.

Small Size

Take it anywhere. Fits in your pocket.

World-compatible AC Adapter (optional)

Accepts 100-240VAC so you can trot the globe.

TECHNICAL SPECIFICATIONS

Interface:

FireWire 800, 400 and USB2 utilizing latest Oxford firmware, OXUF922.

Data Speeds

FireWire 800 port: up to 800 Mbps

FireWire 400 port: up to 400 Mbps

USB2 port: up to 480 Mbps

Power Supply

+5V DC / 1 Amp plug

Operating Temperature

50° - 85° Fahrenheit (10° - 30° Celsius)

Operating Humidity

5% to 95%, noncondensing

Drive Compatibility

ATA5 and ATA6 2.5" 9.5mm notebook drives.

Check website for latest information.

Operating System

Windows 2K, XP

Macintosh OS 9.1, 9.2, OS X

Linux distributions that support FireWire

Shipping Weight

2 lbs.

Dimensions

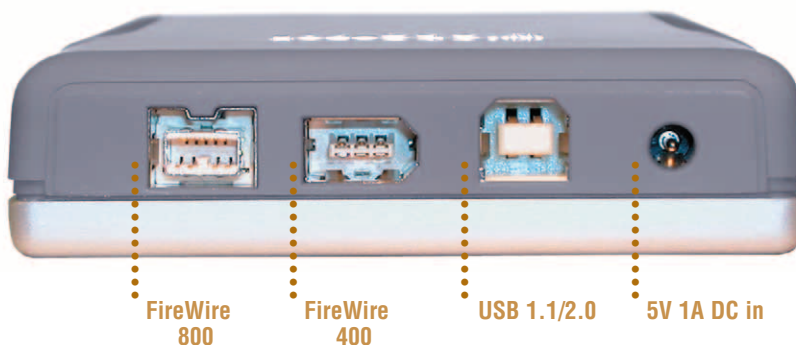

5.4" x 3.2" x 0.8" (135mm x 81 mm x 20mm)

Certification

FCC, CE

INCLUDES:

Brushed and Embossed enclosure with grip textured body
 FireWire 800 cable
 FireWire 400 cable
 FireWire 400 iLink adapter
 USB power cable with pass through
 USB2 cable
 Information CD
 Limited Warranty Statement
 AC adapter is optional
 Order code: CGB
