

CD/DVD IMAGER

Meet WiebeTech's CD/DVD Imager

You've earned your warrant and entered the premises intent on capturing data as quickly and efficiently as possible, only to come face to face with a pile of CDs and DVDs - all of which need to be quickly backed up for later analysis. WiebeTech's CD/DVD Imager comes to your aid. It automatically images and archives CDs and DVDs to hard disk, takes a picture of each CD/DVD and stores it with the disk image.

Superior Chain of Evidence

With the CD/DVD Imager, investigations can be performed more quickly, with greater evidence reliability, and with less expense.

Automatic

Load up the robot and let it fly. It will automatically image and archive CDs and DVDs to hard disk. A camera is mounted to the top of the robot because a picture comes in very handy when trying to match up a disk image with physical evidence.

Smart

Images made by the robot work easily with forensic software (EnCase, ILook or Forensic Toolkit), and the robot correctly handles some of the stranger disk formats such as open session and multi-session disks.

FEATURES

- Automatically image and archive CDs and DVDs to hard disk.
- A photograph of the actual disk is taken and stored with the disk image.
- Disk images ready for addition to EnCase, ILook or FTK.
- Correctly handles data from 'tricky' disks (such as open session HFS, multi session).
- Stores files in enumerated folders
- Reports success/failures.

INCLUDES:

CD/DVD imaging robot with 25 disk capacity
Camera mounting arm and camera
USB cable
Power Cable
Software and user license
Information CD
Limited Warranty Statement

Order Code: CDI-1

TECHNICAL SPECIFICATIONS

Interface

Robot interface: USB2
Camera interface: USB2

Power Supply

100-240VAC (Auto Switching) 200 Watts

Disk Capacity

The input and output hopper can hold 25 disks. Hoppers may be reloaded while the unit is working for continuous workflow.

Disk Compatibility

Windows, Mac OS, Linux disks

Operating System

Linux

Data Speeds

USB 2 (480Mbps)

Operating Temperature

50° - 85° Fahrenheit (10° - 30° Celsius)

Operating Humidity

5% to 85%, noncondensing

Shipping Weight
