

### Smallest Dock yet!

Now you can attach SATA 1 or SATA 2 drives to your computer via a single USB cable. This new mini Dock is incredibly small and very attractive. Made of rugged aluminum, it nicely complements the rest of the WiebeTech DriveDock line.

Attach SATA drives to your computer via a single USB cable and transfer data at up to 480 Mbps. You can easily monitor the LED indicator; power attached, power on and power. A +5/+12V DC adapter is included and a power switch allows for safe powering up and down.

### Treat it like any other drive

Use mini USBDock just as you would use a standard external drive. Retrieve data, copy information from drive to drive or access many drives quickly. View or download the entire drive volume with the same performance as any external drive.

Using it is easy! Attach power, attach the drive, connect to your computer with the USB cable, and read/write/access the drive's data just as if it were inside the computer.

### Rugged design, built to last

Grab it and go -- mini Docks are tough as nails and made to last. The small and rugged case is constructed from briefcase-tough aluminum for durability.

## MINI USBDOCK™

## FEATURES

### Connection

Directly attaches to any SATA 1 or SATA 2 drive.

### LED Indicators

3 LED indicators: power attached, power on and access.
