Allows Power Up / Down.

Aluminum Case

Briefcase tough; excellent heat dissipation.

Small Size

Fits in a pocket

INCLUDES:

mini SATADock
AC adapter
SATA cable
Information CD
Limited Warranty Statement
Order code: MSD

Smallest Dock yet!

Now you can attach SATA drives to your computer via a single SATA cable. This new mini Dock is incredibly small and very attractive. mini SATADock transfers data at fast SATA speed (up to 3.0 GHz). Check power status with two LED indicators; power attached and power on. Made of rugged aluminum, it nicely complements the rest of the WiebeTech DriveDock line. It uses a +5/+12V DC adapter (included) and includes a power switch to allow for safe power up and down of the drive.

Treat it like any other drive

Use the mini SATA Dock just as you would use a standard external drive. Retrieve data, copy information from drive to drive or access many drives quickly. View or download the entire drive volume with the same performance as any external drive.

Using it is easy! Attach power, attach the drive, connect to your computer with the appropriate cable, and read/write/access the drive's data just as if it were inside the computer.

Rugged design, built to last

Grab it and go -- miniDocks are tough as nails and made to last. The small and rugged case is constructed from briefcase-tough aluminum for durability.

TECHNICAL SPECIFICATIONS

Interface

SATA to drive
SATA to host
